		Application No.	Applicant(s)			
		10/824,003	KRAUSE ET AL.			
	Office Action Summary	Examiner	Art Unit			
		Marianne L. Padget				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1)⊠	Responsive to communication(s) filed on <u>8/1/0</u>	95 & 4/14/04.				
		action is non-final.	•			
3)□	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is					
	closed in accordance with the practice under E	Ex parte Quayle, 193	35 C.D. 11, 453 O.G <sub>.</sub> 213.			
Disposit	ion of Claims					
5) 6) 7)	Claim(s) <u>1-87</u> is/are pending in the application.  4a) Of the above claim(s) is/are withdray.  Claim(s) is/are allowed.  Claim(s) is/are rejected.  Claim(s) is/are objected to.  Claim(s) <u>1-87</u> are subject to restriction and/or of	wn from consideration				
Applicat	ion Papers			•		
9)☐ The specification is objected to by the Examiner.						
10)☐ The drawing(s) filed on is/are: a)☐ accepted or b)☐ objected to by the Examiner.						
	Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).					
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).  11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.						
Priority (	under 35 U.S.C. § 119					
<ul> <li>12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).</li> <li>a) All b) Some * c) None of:</li> <li>1. Certified copies of the priority documents have been received.</li> <li>2. Certified copies of the priority documents have been received in Application No.</li> <li>3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).</li> <li>* See the attached detailed Office action for a list of the certified copies not received.</li> </ul>

1)  Notic 2)  Notic 3)  Inform	e of References Cited (PTO-892) e of Draftsperson's Patent Drawing Review (PTO-948) mation Disclosure Statement(s) (PTO-1449 or PTO/SB/08) r No(s)/Mail Date	Pap	erview Summary (PTO-413) per No(s)/Mail Date ice of Informal Patent Application (PTO- er:	152)		

Application/Control Number: 10/824,003 Page 2

Art Unit: 1762

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-42, 44-50, 52-57, 59-64 & 66-70, drawn to a method of forming a lenticular image, classified in class 427, subclass 288 or 356+ or 359+ or 385.5+ or 510 or 504.
- II. Claims 43, 51, 58, 65 & 71, drawn to a lenticular image, classified in class 428, subclass141 or 167 or 182.
- III. Claims72-87, drawn to a deposition apparatus having lenticular pattern forming means, classified in class 118, subclass 100+ or 200+.
- 2. Claims 1-3, 9-14, 17, 19, 22-74 &77-86 are generic to a plurality of disclosed patentably distinct species comprising: A- curing species, e.g.

  i) electron beam,
  - ii) UV,
  - iii) heat;

and B- coating or printing deposition techniques, e.g.

- i) flexographic,
- ii) gravure,
- iii) slot die.

Applicant is required under 35 U.S.C. 121 to elect a <u>single</u> disclosed species <u>from each</u> of A & B, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. The inventions are distinct, each from the other because:

Application/Control Number: 10/824,003

Art Unit: 1762

Inventions I and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process (MPEP § 806.05(e)). In this case, the substrate treated in the apparatus is not part of the apparatus; hence the apparatus may be used to make different products, such as those with lenticularly formed surfaces, but not image underlying the applied coatings.

- 4. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by various techniques, as its structure of printed substrate coated with a lenticularly patterned material may be made using different cuing sequences, such as during coating or patterning or the lenticular patterning could be formed via a molding process with deposition. Choice of techniques would be partially dependant on deposition material characteristic, which are generic in all products & most processes, especially considering that while curing might imply polymeric, it does not necessitate it, since other materials, like ceramics may be cured.
- Inventions III and II are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the product can be made by different apparatus, as illustrated by the different processes discussed above, or the apparatus may make different products as also discussed above.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I or III, etc., restriction for examination purposes as indicated is proper.

7. A telephone call was made to Thomas Pienkos on 8/12/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Mr. Pienkos requested a written restriction.

- 8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
- 10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marianne L. Padgett whose telephone number is (571) 272-1425. The examiner can normally be reached on M-F from about 8:30 a.m. to 4:30 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Meeks, can be reached at (571) 272-1423. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
